September 2024 - February 2024

EDUCATION

Janaki English Boarding School— SEE (*3.35)*

Arniko Awasiya Secondary — +2 (*2.85)*

Samriddhi College — BSc. CSIT (67.79%)

PROJECTS

Portfolio Design – *UI designed in Figma*

A clean and minimal personal portfolio website designed to highlight my visual design skills, layout sense, and overall design capabilities.

Transport App – *UI/UX designed in Figma and FigJam*

An intuitive public transportation app that allows users to search routes, view real-time arrival information, and access other smart commuting features. Focused on usability, accessibility, and seamless navigation.

Herbal Website Landing Page – UI Designed in Figma

A soothing and informative landing page for a herbal product website. It presents a variety of herbs, their health benefits, and product offerings in a clean layout. The design features calming colors, natural textures, and clear calls to action to create trust and engage wellness-focused users.

Amber Alert System – *Created using Django & React Native*

A mobile app for tracking missing person cases.

Features:

- View active alerts and solved cases.
- **Admin Roles:**
  - **Sub-Admin:** Can create new cases and move solved cases to the solved list.
  - **Super-Admin:** Can create new admins and monitor case handlers.

Afoodie App – *Built using React.js, Firebase and Tailwind CSS*

Users Features:

- Order food from home.
- Scan a QR code at a table to view the food menu.

Admin Features:

- Assign tables to customers.
- Create and manage menus.
- Track sales and revenue.
- Add and manage staff members.

DibyaCare Website – *Built with React.js, Firebase and Tailwind CSS*

Allows users to:

- Register elderly individuals needing special care.
- Find the nearest DibyaCare center.
